PUREZZA™

PREMIUM WATER

Dear customer

Welcome! As the newest member of our Purezza family, you are now also part of the Waterlogic group. Thank you so much for your business.

Purezza is committed to delivering the best quality drinking water possible for you and your patrons through innovative technology and eco-friendly thinking.

We are also passionate about every aspect of your experience with us. I sincerely hope that you enjoy both your new Purezza system and dealing with our friendly team.

Purezza strives to ensure your total satisfaction at all times, however, if you ever feel we are not fulfilling this, then please contact me. Our goal is for you to be a happy customer for years to come.

Yours faithfully,

Carl Crowley
Managing Director Australia
Phone: 0455 047 774

Limitless and fresh

What makes our water premium? In one word: freshness. Using the latest technology, Purezza systems will filter, chill and carbonate your water at the point of dispense. This ensures that every time you pour Purezza water, it's of the freshest and highest quality, glass after glass.

Reduce your carbon footprint

Approximately 80% of plastic water bottles end up in landfills and then can take up to 1,000 years to decompose. Installing Purezza means you can eliminate the use of bottled water and actively demonstrate your commitment to environmental sustainability.

Versatile profit opportunity

Purezza represents a high-profit margin opportunity with a 750ml bottle costing an average of 6-8c to fill. Purezza gives you the flexibility to sell by the bottle, by cover charge or as part of a function beverage package. You can also expand your beverage menu with house-made sodas and sparkling drinks. The versatility of Purezza is an opportunity to add thousands to your bottom line every year!

Systems and service

Purezza systems are Italian-made and guaranteed to meet the highest demands of any venue. Fibredyne II media submicron filtration and AgION® antimicrobial protection means your system is equipped with the best technology, inside and out. Our qualified technicians will service your equipment and our customer service team is on hand to provide support when you need it.

Increase efficiency

Switch to Purezza and say goodbye to the admin of managing inventory and the labour of stocking bottles. You can reclaim storage and fridge space and staff can stay hydrated without consuming retail stock.

Add sparkle to your menu

Expand your beverage menu and revenue stream

Make the most out of your system by introducing indulgent new beverages that are simple to produce with Purezza. Just add syrups and natural ingredients to produce home-made sodas, sparkling iced teas, cocktails, mocktails and fruit detox waters. Here are some ideas for unique beverages. You can find more easy recipes on our website purezza.com.au.

Fresh lime juice
Purezza sparkling water
Garnish: lemon and lime

PEACH & RASPBERRY FIZZ

Raspberry flavour
Peach flavour
Fresh lemon juice
Purezza sparkling water
Garnish: peach and raspberries

FAQs & Troubleshooting

How do I order more glass serving bottles?

Our 750ml Purezza bottles are reusable and recyclable. Should you need to order more, please contact us on 1300 792 673 and select option '3'. The bottles are delivered in boxes of 12 and available in a still or sparkling design.

How do I turn the machine on?

The on/off switch is located on the black operation panel at the side of the Purezza machine. The switch is illuminated green when the machine is on.

How do I adjust the water temperature?

You can adjust water temperature by using the thermostat dial, which is located on the black operation panel on the side of the machine. The thermostat is controlled by the small screw inside the dial of white numbers so a flat-head screw driver will be required to adjust the dial setting. The recommended setting is between marks 4 and 5. It is not recommended to increase the thermostat setting above mark 5.

How do I adjust the Co2 carbonation?

The Co2 carbonation can be adjusted using the regulator on the top of the Co2 bottle. The recommended setting for the gas is between 3 and 4.

The water flows too fast/ too slow!

The output flow speed of the water can be adjusted using the flow regulator on each tap. The flow regulator is the small lever at the side of the tap.

Does the Purezza system need ventilation?

Yes, it should be well-ventilated area for optimum use. If your thermostat is set at the recommended temperature but the water is not cold, ensure that the area around the system is uncluttered and ventilated as well as is practical. If the system is housed in a cupboard, leave the doors open overnight.

What do I do if the taps are leaking?

If water is leaking from the front of the taps, simply tighten the visible screw at the front of the tap, by turning it in a clockwise direction until tight.

How should I wash the glass serving bottles?

We recommend that serving bottles are washed in a double-cycle commercial dishwasher at a minimum of 82°C. For your convenience, Purezza offers a dishwashing rack that fits 20 Purezza bottles and is sized to fit in most commercial dishwashers.

To order a Purezza dishwashing rack, please call 1300 792 673 and select option '3'.

Waterlogic solutions for hospitality

Our parent company, Waterlogic, is a manufacturer, installer and the largest service provider of point-of-use (POU) water dispensers in Australia. Waterlogic offers a full range of freestanding, benchtop and underbench products that provide chilled, hot, ambient and sparkling water. Here is a selection of products that are commonly used in the hospitality industry, perfectly complementing your Purezza system.

Waterlogic Undersink Chiller

A compact, remote chiller designed to deliver fresh, clean, chilled water as a self-service drinking water station. It is perfect for confined spaces such as service areas and under bench.

| | |
|---------------------|--------------------------------|
| Standard filtration | FibreDyne™ |
| Capacity | 6 litres/hour cooling capacity |
| Outlet requirement | 10 amp |
| Price | \$19/week |

WL2 In-tank UV

This flagship Waterlogic dispenser is perfect for providing employees drinking water in break rooms, as well as front of house. The UV technology filters out pathogens to dispense the best quality drinking water, offering cold, ambient and hot options.

| | |
|---------------------|--|
| Standard filtration | Carbon and in-tank UV technology |
| Capacity | Hot tank: 1.5 litres, Cold tank: 4 litres (freestanding) 2 litres (benchtop) |
| Outlet requirement | 10 amp |
| Price | \$14/week |

Billi Sahara 320

The Sahara offers an unlimited source of boiling and ambient water at the touch of a lever. The space-saving design allows you to maximise under sink storage. Ideal for providing drinking water and hot beverages.

| | |
|---------------------|--|
| Standard filtration | FibreDyne™ |
| Capacity | Unlimited ambient 110 litres/hour boiling water |
| Outlet requirement | 10 amp |
| Price | \$29/week |

Rheem Lazer® Commercial 7.5L

The wall-mounted boiler maximises bench and floor space. Smart technology sleep mode reduces energy use by up to 40%. The high flow capacity unit is perfect for busy venues such as commercial kitchens, restaurants and more.

| | |
|--------------------|---|
| Capacity | 7.5 litres, 50 cups of boiling water ready to use, 123 cups recovery/hour |
| Outlet requirement | 10 amp |
| Price | \$21/week |

"Purezza is a great way to offer our customers more options without taking up too much space in the restaurant."

- T. Sirkka, Sotto Sopra

"We make our own homemade Lemonade - with freshly squeezed lemon, lime and mint. Its a best seller in summer!"

- A. Arkell, Radio Mexico

We love serving water that doesn't involve unnecessary packaging! It keeps you beautiful and saves the planet.

- A. France, Bondi Trattoria

Our service promise

We don't see ourselves as just another supplier. Purezza is a partner who provides seamless service to enable you to focus on your own business vision and goals.

We're extremely proud of our world-class customer service and strive to place your satisfaction at the core of everything we do.

Depending on your rental plan, a fully trained technician will visit your venue to conduct a routine maintenance service. The technician will also ensure your equipment is clean and hygienic.

If at any time you need assistance, just call 1300 792 673 to speak to customer service or send us an email:
